Hello

This is my submission for making revenge porn a crime in New South Wales.

To help tackle the problem of revenge porn. One thing that should be illegal is to prohibit a person that has received a "sext" (sexual text message) from sending it on to any other party which included posting it to the internet. This would bring New South Wales in line with Victoria which has introduced legislation to help stop this. This should be illegal regardless of the device used whether it be a phone, tablet, laptop or home computer.

Another thing that should be considered with this is to make the sending of and the posting online of nude pictures illegal, regardless of whether it is of someone genitals or whether the person is fully exposed, again regardless of the device used.

It should also be illegal to distribute videos of people performing sexual acts or someone showing their genitals or the person fully exposed illegal, regardless of the device used.

Finally, legislation should also be in place so that social media, porn sites and search engines are required to remove any material that was posted on their sites without the person's consent.

This is my submission

Thank you
