Re:- Remaking of Guardianship Regulation 2010

Thank you for referring this matter to the Committee for advice.

The proposed Regulation has been considered in conjunction with the Act, the present Regulation and the Regulatory Impact Statement.

It is noted that the proposed amendments to the present Regulation are minor and do not alter the intent or interpretation of the Regulation.

It is considered that a Regulation along the lines of that proposed is essential for the implementation of the Act and that there is no more cost efficient or socially acceptable method of fulfilling the needs of particular members of the community, who are often elderly or anticipating failing health,.

Yours faithfully,

Peter Thursby OAM
Chairperson
